Preliminary concept plan, Construction plans and documents
Consultation during the construction.

Project status:

Under construction (Opening spring 2015).

DESCRIPTION:

La Pourvoirie Au Pays de Réal Massé has been known for many years as one of the best outfitter in Quebec. Visitors of this great destination will soon have access to a 9-hole par three course offering many challenges and an endless variety of holes and course setups making great use of the native rocks and vegetation.

Efforts will be made to protect the natural aspect of the site and integrate its natural elements in the course. As such, wetlands, creeks and rock outcrops will be featured in this distinctive course. Most holes will feature many angles of approach, different lengths and teeing areas offering different lies in order to encourage players to have fun during their informal rounds.
